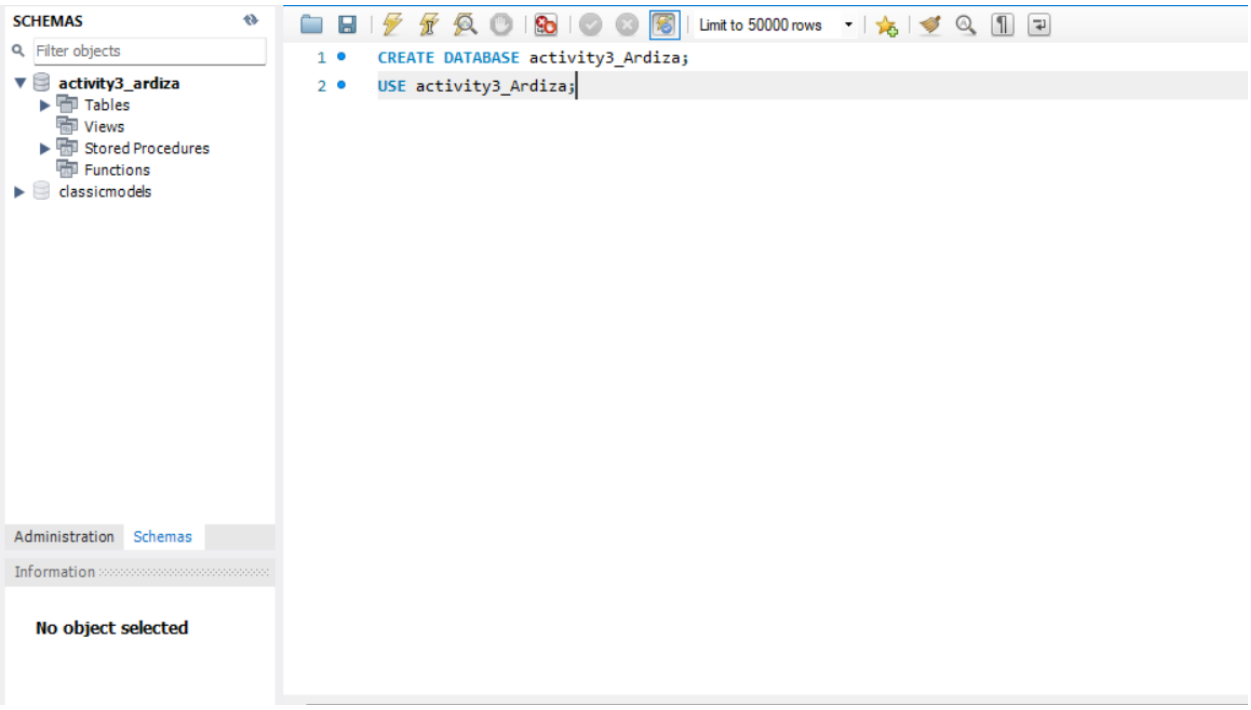
Name:	Prince Philip P. Ardiza	Course ID/Title	IT 2206 – Database Management System
Course/Block	BSIT-SD2A	Date:	March 31, 2026

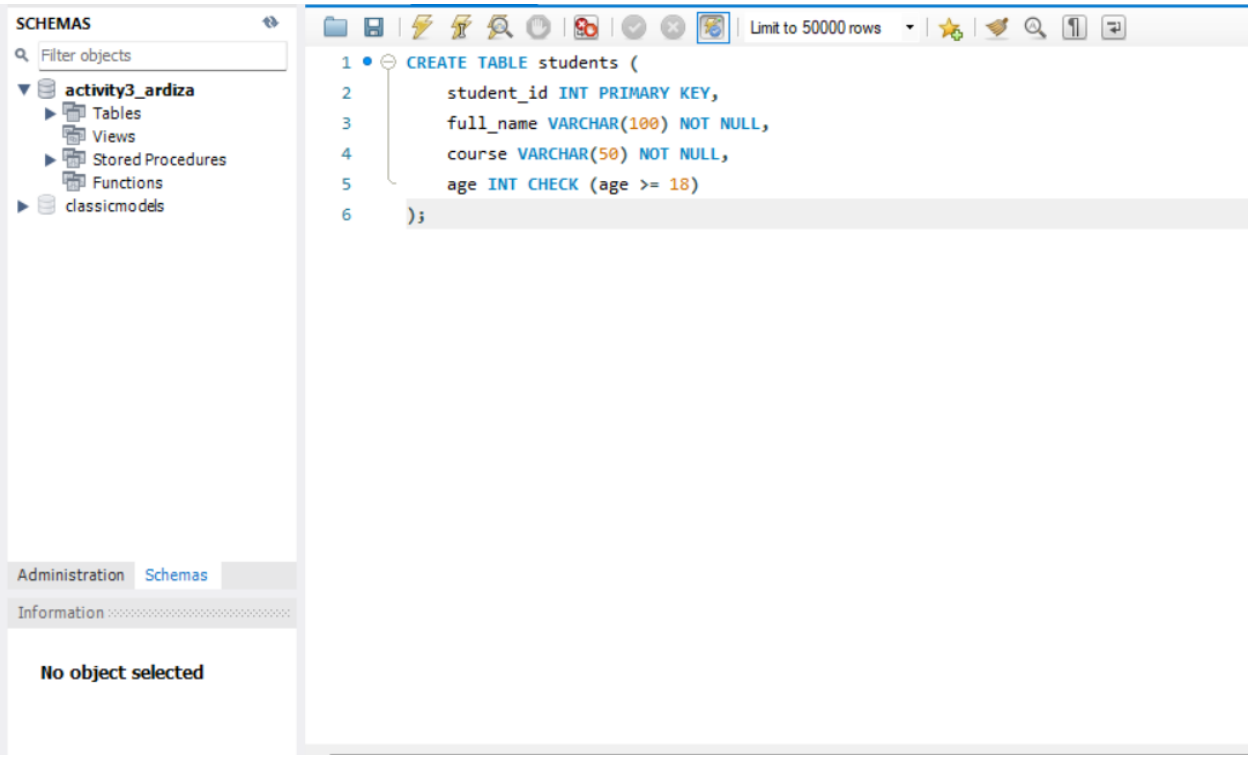
Activity 3 - Cursors

1. Use the attached word file as template.
2. Save your work as pdf and name it “Activity3_Cursors_'Surname'.pdf”.
3. Submit your work before the deadline. Resubmission is not allowed.

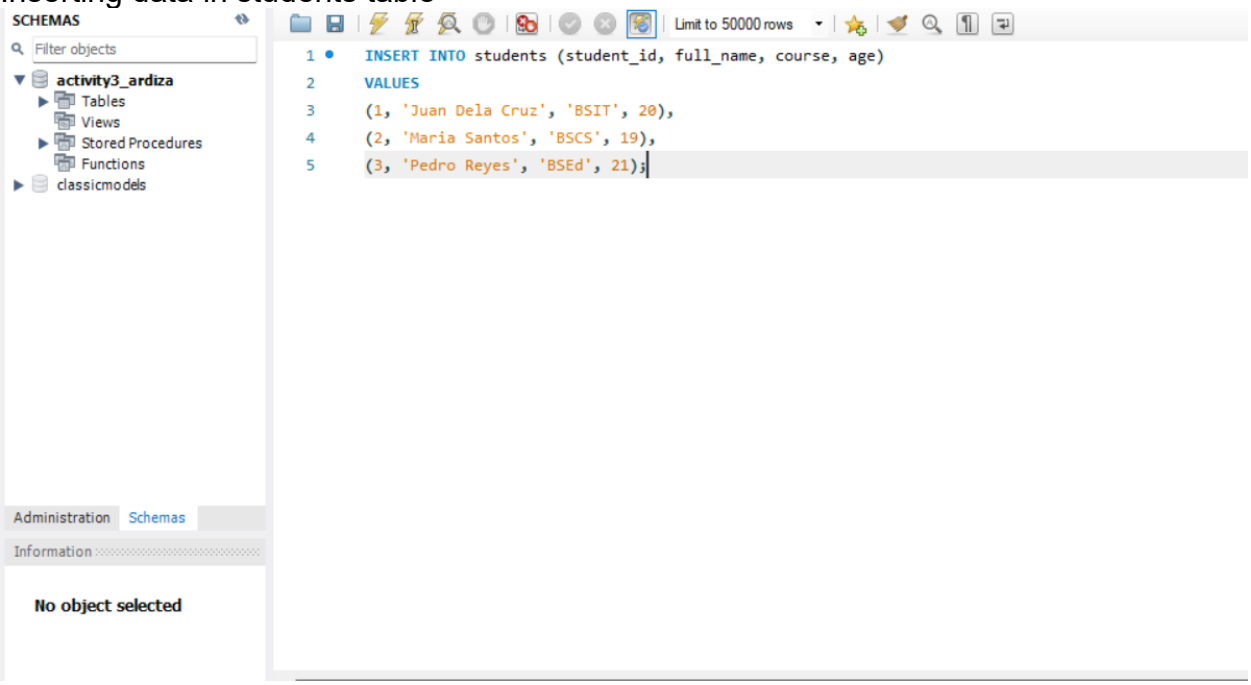
Created database named activity3_Ardiza and use database



Create table name students



Inserting data in students table



Creating and declaring the needed variables for the stored procedure, also declaring the cursor named student_cursor

```
DELIMITER $$

CREATE PROCEDURE fetch_students()
BEGIN
    DECLARE done INT DEFAULT FALSE;
    DECLARE s_id INT;
    DECLARE s_name VARCHAR(100);
    DECLARE s_course VARCHAR(50);
    DECLARE s_age INT;

    DECLARE student_cursor CURSOR FOR
        SELECT student_id, full_name, course, age FROM students;

    DECLARE CONTINUE HANDLER FOR NOT FOUND SET done = TRUE;
```

Opening the cursor and created a loop that fetches each student record row by row

```
    OPEN student_cursor;

    read_loop: LOOP
        FETCH student_cursor INTO s_id, s_name, s_course, s_age;

        IF done THEN
            LEAVE read_loop;
        END IF;

        SELECT s_id AS ID, s_name AS Name, s_course AS Course, s_age AS Age;
    END LOOP;

    CLOSE student_cursor;
END$$

DELIMITER ;

CALL fetch_students();
```

Calling the created procedure

```
33 •  CALL fetch_students();
```
