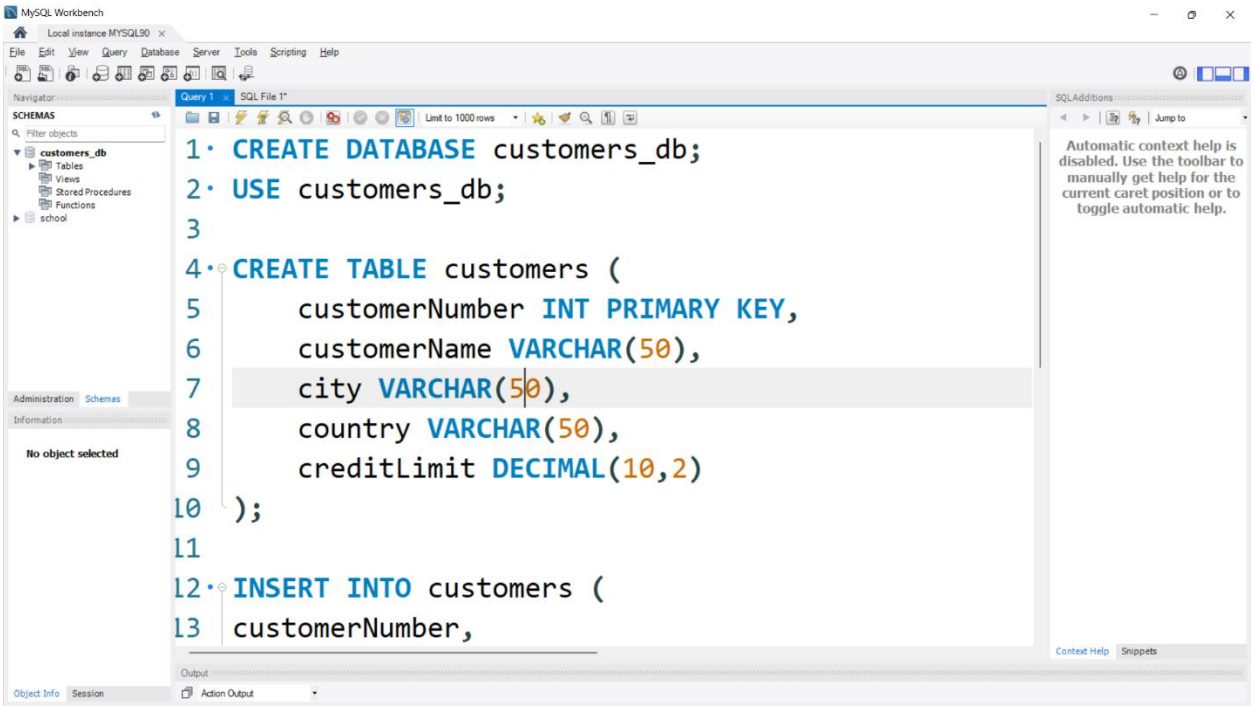
Name:	John Andrei Gutiza	Course ID/Title	IT 2206 – Database Management System
Course/Block	BSIT-SD-2A	Date:	3/29/2026

Activity 3 - Cursors

1. Use the attached word file as template.
2. Save your work as pdf and name it “Activity3_Cursors_'Surname'.pdf”.
3. Submit your work before the deadline. Resubmission is not allowed.

Created database named customers_db and table named customers



Inserting data in customers

```
INSERT INTO customers (
customerNumber,
customerName,
city,
country,
creditLimit
)
VALUES
(103, 'Atelier graphique', 'Nantes', 'France', 21000),
(112, 'Signal Gift Stores', 'Las Vegas', 'USA', 71800),
(114, 'Australian Collectors', 'Melbourne', 'Australia', 117300),
(124, 'Mini Gifts Distributors', 'San Rafael', 'USA', 210500);
```

Creating and declaring the needed variables for the stored procedure, also declaring the cursor named classify_cursor

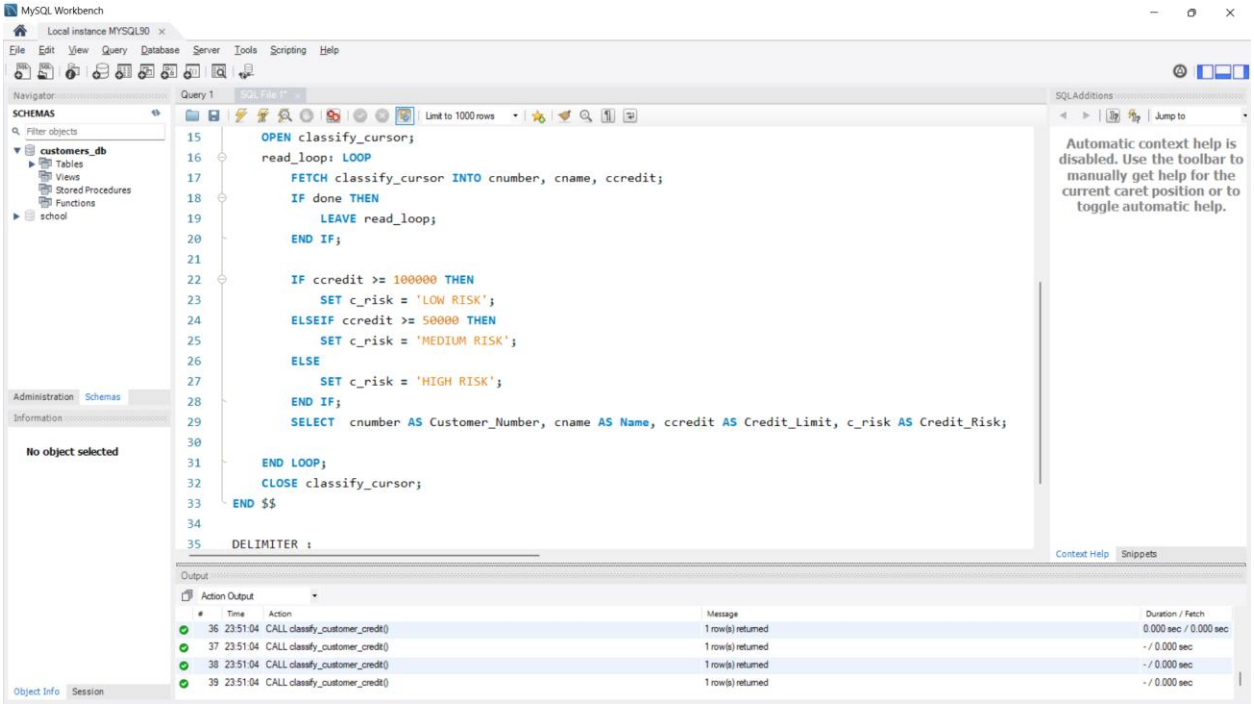
```
DELIMITER $$

CREATE PROCEDURE classify_customer_credit()
BEGIN
    DECLARE cnumber INT;
    DECLARE done INT DEFAULT FALSE;
    DECLARE cname VARCHAR(50);
    DECLARE ccredit DECIMAL(10,2);
    DECLARE c_risk VARCHAR(30);

    DECLARE classify_cursor CURSOR FOR
    SELECT customerNumber, customerName, creditLimit FROM customers;
        DECLARE CONTINUE HANDLER FOR NOT FOUND SET done = TRUE;

    OPEN classify_cursor;
    read_loop: LOOP
        FETCH classify_cursor INTO cnumber, cname, ccredit;
        IF done THEN
```

Opening the cursor and created a loop that evaluates each customer's risk based on Customers' Credit Limit



Calling the created procedure
