Course/Block	BSIT SD 2A	Date:	March 31, 2026

Activity 3 - Cursors

1. Use the attached word file as template.
2. Save your work as pdf and name it “Activity3_Cursors_'Surname'.pdf”.
3. Submit your work before the deadline. Resubmission is not allowed.

CREATE DATABASE

```
CREATE DATABASE activity3_balubayan;
USE activity3_balubayan;
```

INSERT DATA

```
INSERT INTO customers VALUES
(103, 'Atelier graphique', 'Nantes', 'France', 21000),
(112, 'Signal Gift Stores', 'Las Vegas', 'USA', 71800),
(114, 'Australian Collectors', 'Melbourne', 'Australia', 117300),
(124, 'Mini Gifts Distributors', 'San Rafael', 'USA', 210500);
```

CREATE TABLE

```
CREATE TABLE customers (
    customerNumber INT PRIMARY KEY,
    customerName VARCHAR(100) NOT NULL,
    city VARCHAR(50) NOT NULL,
    country VARCHAR(50) NOT NULL,
    creditLimit DECIMAL(10,2) CHECK (creditLimit >= 0)
);
```

CREATE PROCEDURE USING CURSOR

```
DELIMITER $$

CREATE PROCEDURE fetch_customers()
BEGIN
    DECLARE done INT DEFAULT FALSE;
    DECLARE c_name VARCHAR(100);
    DECLARE c_credit DECIMAL(10,2);

    DECLARE cur_customers CURSOR FOR
        SELECT customerName, creditLimit FROM customers;

    DECLARE CONTINUE HANDLER FOR NOT FOUND SET done = TRUE;

    OPEN cur_customers;

    read_loop: LOOP
        FETCH cur_customers INTO c_name, c_credit;

        IF done THEN
            LEAVE read_loop;
        END IF;

        SELECT c_name AS customerName, c_credit AS creditLimit;

    END LOOP;

    CLOSE cur_customers;
```

CALL THE PROCEDURE
